DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 17-18, drawn to a glass substrate.

Group II, claim(s) 19-23, drawn to an article.

Group III, claim(s) 24, drawn to a method.

Group IV, claim(s) 25-32, drawn to a coating liquid.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a special technical relationship among those inventions involving one or more of the same corresponding technical features, which define a contribution over the prior art. See 37 CFR 1.475. The special technical feature of the present invention, a coating liquid comprising: a hydrolysable silicon compound and/or hydrolysate having an alkylene group; and a hydrolysable zirconium compound and/or hydrolysate or a hydrolysable titanium compound and/or hydrolysate, does not define a contribution over the prior art, as is revealed by Hugh et al. (US

2,512,058), see col. 2, lines 1-60. Consequently, a lack of unity of invention exists.

See 37 CFR 1.475 and MPEP 1850.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
